QUESTIONS RESIDENTS ASK

When will my building be worked on?

Work moves Zone 1, 2, 3, then 4. You get a notice on your door 7 days ahead and a reminder 24 hours ahead. Current dates are always on the QR page.

Do I need to be home?

Only if your windows need inside access. Your notice will say so, and you book a time slot.

Where do I park while my building is in work?

Move your vehicle out of your garage or carport before your dates. Temporary parking: [LOCATION, BOARD TO CONFIRM].

How loud will it be?

Roof tear-off days are the loudest. Work stays inside posted hours: [START] to [END], [DAYS].

What if something gets damaged?

Report it the same day through the QR page or the PM. Every building is photographed before work starts, so we can see what changed and fix it.

What happens if it rains?

No roof is opened with rain in the forecast, and every roof is closed up the same day. If your dates move, you get a schedule change notice.

I have a satellite dish, camera or doorbell on the wall.

Tell the PM before your dates. Wall-mounted items are removed and reset as part of the siding work.

Who chose the colors and materials?

The board approved the color and material schedule. Questions about choices or association funding go to the board.

Can I talk to the crews?

Crews are polite but will send you to the PM. That keeps one record of every request and answer.
